Note

There are four separate indices in this annual cumulative index to *Language and Language Behavior Abstracts* Volume XI (1977): author index, subject index, book review index, and source publication index. All references to abstracts contained in *LLBA* are by the abstract number which precedes each abstract.

The *author index* is a name and not a person index. Rules of alphabetization are applied by computer. No attempt has been made to consolidate multiple entries for the same person if his or her name was not listed exactly the same way every time it appeared in the source publications referenced.

The *subject index* contains descriptive phrases intended to provide information about the contents of each article abstracted. This information may include the general subject matter or the dependent variable(s); the independent variable(s); tests; population; and additional information such as book review, case report, conference proceedings, review of the literature, etc.

The *book review index* lists the author(s) and original title for every book of which a review was abstracted.

The *source publication index* includes the full title, subtitle(s), and current subscription address of publication screened for articles which satisfy the *LLBA* selection criteria. References to articles abstracted from each publication, if any, are by year, volume, issue, sequence number, month/season, and pagination.

Reproduction Service is available on all abstracts published from journals having the symbol **Reproduction Service** immediately preceding its title.

linguafranca

We speak your language.

linguafranca. We speak your language.

The proliferation of documents within linguistics and related disciplines makes **linguafranca** the most effective tool for focusing on the latest and broadest range of developments in the field.

linguafranca offers linguists, educators, researchers, therapists, and other language specialists the opportunity to consult with a staff of information professionals who will answer your research questions with fast, comprehensive searches of the LLBA and related data bases. We offer:

- both machine and manual searches
- document delivery, through our **Reproduction Service**
- reprints of pre-1973 LLBA abstracts unavailable from any other on-line retrieval system.

As producers of the LLBA data base, we are in a unique position to design a precise search strategy that is most responsive to your needs. Because of the interdisciplinary nature of linguistics, **linguafranca** offers the option of cross-data base searches. We access **sociological abstracts,** ERIC, Social SciSearch, Psychological Abstracts, Exceptional Child Education Abstracts, and Comprehensive Dissertation Abstracts.

Cost estimates are prepared in advance with no obligation. Searches can be obtained on a subscription basis or on a per-search charge. One-term searches within the LLBA data base can cost as little as $20 (plus $.15 per citation for off-line prints) and can go as high as $500 for complex searches across many data bases.

linguafranca, we speak your language. Why not give us a call.

Search requests are available from:

linguafranca

We speak your language.

linguafranca. We speak your language.

The proliferation of documents within linguistics and related disciplines makes **linguafranca** the most effective tool for focusing on the latest and broadest range of developments in the field.

linguafranca offers linguists, educators, researchers, therapists, and other language specialists the opportunity to consult with a staff of information professionals who will answer your research questions with fast, comprehensive searches of the LLBA and related data bases. We offer:

- both machine and manual searches
- document delivery, through our **Reproduction Service**
- reprints of pre-1973 LLBA abstracts unavailable from any other on-line retrieval system.

As producers of the LLBA data base, we are in a unique position to design a precise search strategy that is most responsive to your needs. Because of the interdisciplinary nature of linguistics, **linguafranca** offers the option of cross-data base searches. We access **sociological abstracts,** ERIC, Social SciSearch, Psychological Abstracts, Exceptional Child Education Abstracts, and Comprehensive Dissertation Abstracts.

Cost estimates are prepared in advance with no obligation. Searches can be obtained on a subscription basis or on a per-search charge. One-term searches within the LLBA data base can cost as little as $20 (plus $.15 per citation for off-line prints) and can go as high as $500 for complex searches across many data bases.

linguafranca, we speak your language. Why not give us a call.
